

An ultra lightweight ramp, the ideal solution for loading scooter and electric wheelchairs into vehicles. Comprising two channels that fold in half requiring minimal storage space in the vehicle. The Channel Ramps are easy to position, handle and transport. They have a unique slip-resistant surface and a quality paint finish. Available in standard lengths between 1680mm to 2135mm. Alternatively we can manufacture to your specific requirements.

The Channel Ramp takes away the need to lift or dismantle heavy wheelchairs or scooters. Perfect for 4-wheeled machines, giving a safe passage for both the machine and user.

...providing **access** where you need it

Model	Length	Width	SWL	Weight
